

Riyaji Devindu

Software & AI/ML Engineer

+94 76 441 7141

riyajidevindu.samasundara@gmail.com

[LinkedIn Profile](#) | [GitHub Profile](#)

PROFESSIONAL SUMMARY

Engineering graduate with a solid background in software development and system design, combined with a strong interest in AI-based solutions. Experienced in Full Stack Development (Java, Python, PHP) and Emerging Tech (Rust, LLMs). Focused on creating efficient, real-world systems through continuous learning and innovation.

EDUCATION

University of Ruhuna

B.Sc. Eng. in Computer Engineering

Sri Lanka

Current GPA: 3.58

TECHNICAL SKILLS

Languages: Python, Rust, PHP, JavaScript/TypeScript

Frameworks: FastAPI (Python), Laravel (PHP), Tauri (Rust), React.js, Flutter

AI & ML: LLMs, NLP, LangChain, Computer Vision (OpenCV, YOLOv8), PyTorch, TensorFlow, Ollama, Vector DBs

Databases: PostgreSQL, MySQL, MongoDB

Tools: Docker, Kafka, AWS, Git, Jira, Notion, RabbitMQ

Others: Network Basics, Linux Basics, Arm Robotics Basics

EXPERIENCE

Apps Technologies (Pvt) Ltd.

Associate Software Engineer

Remote

[Nov 2024] – [Jan 2025]

- Contributed to the development and maintenance of ERP systems using Laravel, PHP, and MySQL.
- Focused on backend development, including complex business logic implementation and database management.
- Optimized database queries to improve system performance and reliability.

Apps Technologies (Pvt) Ltd.

Software Engineering Intern & Intern AI Team Lead

Remote

[May 2024] – [Oct 2024]

- Led the AI Intern team in developing **BeMA**, a healthcare-focused AI-integrated mobile application.
- Developed dynamic web applications using Laravel, PHP, and MySQL, ensuring responsiveness and scalability.
- Managed project timelines and documentation using Notion, fostering agile teamwork and technical coordination.

KEY PROJECTS

Privacy-Aware Prompt Enhancement System

Rust, Tauri, React, SLMs

- Developed a cross-platform desktop application to mitigate privacy risks in LLM usage.
- Implemented local detection mechanisms to exclude sensitive user data while preserving prompt intent.
- Created a 13,000-row custom dataset for model fine-tuning to support privacy-preserving NLP.

WhatsApp Reply Automation E-Commerce Platform

Python, FastAPI, RabbitMQ

[Code](#) | [Post](#)

- Built an automated customer service agent using Agentic AI to respond to WhatsApp queries in real-time.
- Integrated product database retrieval to ensure accurate, context-aware responses.
- Utilized RabbitMQ for asynchronous message handling and microservices communication.

Sensitive Data Detection in Images

FastAPI, OpenCV, YOLOv8, Docker

[Code](#) | [Post](#)

- Engineered a privacy-focused web app to redact sensitive info in images using fine-tuned YOLOv8 models.
- Optimized inference using ONNX Runtime and containerized the full stack using Docker for easy deployment.

Bookfair Reservation Management System

Spring Boot, Kafka, Microservices

[Code](#)

- Designed a microservices-based reservation platform with separate portals for users and employees.
- Implemented Apache Kafka for event-driven communication and JWT for secure authentication.

BeMA - Healthcare AI App

Flutter, Python, Groq

[Code](#) | [Post](#)

- Developed a personalized healthcare app featuring daily reminders, stress-relief techniques, and a chatbot.
- Integrated voice-based Q&A systems to support user engagement and wellness tracking.

CERTIFICATIONS

Oracle Generative AI Professional Certification (2024)

Oracle AI Foundations Associate Certification (2023)

Huawei HCIA - Cloud Service V3.0

Full-Stack AI with Ollama & Mistral AI Development (Udemy)

Mistral AI Development (Udemy)

VOLUNTEERING & LEADERSHIP

Volunteer Management Committee Lead, IEEE Student Branch, UOR (2025-2026)

Program & Event Organizer, IEEE IAS Chapter, UOR (2024-2025)

Editor, IEEE IAS Chapter, UOR (2023-2024)
