PROFESSIONAL SUMMARY

A fast-learning Computer Engineering graduate seeking new opportunities. I have a strong background in software development and AI. I am eager to apply my programming and system design skills to solve complex problems and quickly adapt to new technical challenges.

EDUCATION

03/2021 – 01/2026 Sri Lanka	University of Ruhuna <i>B.Sc. (Hons) in Computer Engineering</i> GPA: 3.65 / 4.00
2017 – 2019 Sri Lanka	S.W.R.D. Bandaranayaka National College, Panduwasnuwara <i>G.C.E. Advanced Level Examination (2019)</i> Z Score - 1.8866 (Physical Science stream) Chemistry A, Physics: A, Combined Mathematics: B
2011 – 2016 Sri Lanka	S.W.R.D. Bandaranayaka National College, Panduwasnuwara <i>G.C.E. Ordinary Level Examination (2016)</i> 8 - A's , 1 - B (English Medium)

PROFESSIONAL EXPERIENCE

06/2026 – Present Remote	Freelancing Software Engineer <i>NS Tech Solutions</i> - Concurrently developing an e-commerce platform and a template-based web infrastructure. - Creating secure backend microservices to monitor live container health, manage client deployment versions, and track system backups.
-----------------------------	---

Apps Technologies (Pvt) Ltd.

11/2024 – 01/2025 Remote	Associate Software Engineer - Developed and maintained the Pinthanna ERP backend using Laravel, PHP, and MySQL. - Optimized database queries and implemented complex business logic to improve system performance and reliability.
05/2024 – 10/2024 Remote	Software Engineering Intern & Intern AI Team Lead - Led an AI intern team to develop BeMA, an AI-integrated healthcare mobile application. - Built scalable web applications using Laravel, PHP, and MySQL, while managing agile project workflows via Notion.

SKILLS

Programming Languages

Python, Java, Rust, PHP

Databases

PostgreSQL, MySQL, MongoDB

AI & ML

LLMS, NLP, LangChain, Computer Vision, Ollama, Vector DBs

Soft Skills

Team Work, Communication, Time Management, Leadership

Tools

Docker, Kafka, AWS, Git, Jira, Notion, RabbitMQ

Others

Network Basics, Advanced Data Communication, Linux Basics

UNIVERSITY PROJECTS

Privacy-Aware Prompt Enhancement System (Final Year Research Project)

- This project involved developing a desktop application to protect user privacy when using AI. The system identifies and removes sensitive personal data from prompts while maintaining the original meaning. A custom dataset of 13,000 rows was created to fine-tune the models, ensuring high accuracy and better data security.
- **Technologies Used:** Rust, Tauri, React, SLMs

WhatsApp Reply Automation E-Commerce Platform

- An automated customer service agent was built using Agentic AI to respond to WhatsApp queries in real-time. A product database was integrated to ensure accurate, context-aware responses for users. RabbitMQ was utilized for asynchronous message handling and to manage communication between microservices efficiently.
- **Technologies Used:** Python, FastAPI, RabbitMQ

Sensitive Data Detection in Images

- A privacy-focused web application was engineered to redact sensitive information in images using fine-tuned YOLOv8 models. Performance was optimized using ONNX Runtime for faster inference, and the full stack was containerized using Docker to ensure easy deployment.
- **Technologies Used:** FastAPI, OpenCV, YOLOv8, Docker

Bookfair Reservation Management System

- Designed a microservices-based reservation platform with separate portals for users and employees. Implemented Apache Kafka for event-driven communication and JWT for secure authentication.
- **Technologies Used:** Spring Boot, Kafka, Microservices

BeMA - Healthcare AI App

- A personalized healthcare app was developed featuring daily reminders, stress-relief techniques, and an interactive chatbot. Voice-based Q&A systems were integrated to support user engagement and facilitate wellness tracking for a better user experience.
- **Technologies Used:** Flutter, Python, Groq

LANGUAGES

Sinhala

- Native

English

- Proficient

CERTIFICATIONS

- Oracle Generative AI Professional Certification (2024)
- Oracle AI Foundations Associate Certification (2023)
- Huawei HCIA - Cloud Service V3.0
- Full-Stack AI with Ollama & Mistral AI Development (Udemy)
- Mistral AI Development (Udemy)
- Soft Skills Development Course (Career Guidance Unit, UOR)

VOLUNTEERING & LEADERSHIP

- | | |
|-------------|--|
| 2025 – 2026 | Volunteer Management Committee Lead, IEEE Student Branch, UOR |
| 2024 – 2025 | Program & Event Organizer, IEEE IAS Chapter, UOR |
| 2023 – 2024 | Editor, IEEE IAS Chapter, UOR |
